COMPANY PROFILE

MULTI-MISSION SATELLITE DATA

Eurimage Company Profile

QUICKBIRD

Since 1989, Eurimage has provided global satellite digital data, both directly to end customers and through a network of more than 150 expert Application Providers world-wide. Products include optical, thermal, radar and infrared data, offering a variety of mission and sensor types to meet the widest range of user needs.

LANDSAT 7 ETM+

Institutional clients include the Joint Research Centre of the European Commission, the European Union Satellite Centre, several organizations of the United Nations based in Europe and other international organizations.

LANDSAT TM & MSS

Eurimage is a Finmeccanica Company. Eurimage's shareholders are Telespazio (Italy) and EADS Astrium (Germany).

Envisat

Missions

ERS

Eurimage is the Master Distributor for customers in Europe and the Mediterranean basin (except for non-international organizations in Italy) of world-wide products from the DigitalGlobe high-resolution QuickBird mission, which provides data at up to 60-centimetres resolution, the highest resolution available from any commercial satellite.

RADARSAT

As the European Space Agency's cost-sharing partner in the Landsat programme, Eurimage has global distribution rights for ESA Landsat 1-5 and 7 data.

IRS

Eurimage is an official ESA commercial distributor with a world-wide distribution license for both ERS and ENVISAT data through the EMMA Consortium, in which Eurimage is the Master Distributor.

ASTER

Eurimage on the Web

Full information on Eurimage Products & Services is available from

www.eurimage.com

along with sample imagery, demonstration applications and tutorials on image processing, Catalogues and Quick Look Browsers, Documentation and Software.

Through agreements at international level with satellite operators and receiving stations, Eurimage also provides Landsat data from the USGS and other International Ground Stations, Spot 1-5, IRS, ASTER and Radarsat.

Catalogues

Eurimage provides easy access to the free catalogues of its data, EiNet and DESCW, through its web site: www.eurimage.com. Users can search by mission, geographical area, date and cloud-cover criteria and view Quick Looks of selected scenes.

Applications & Product Development

Eurimage data is distributed to a global user community: government agencies, scientists, industry and commerce and private customers.

Applications include agricultural land use, monitoring of forests and coastlines, ice route mapping, change analysis at regional, national or global level, archaeology and more. High-resolution data gives users accurate, timely information for urban planning and infrastructure management.

An experienced application and product development team works closely with key clients in developing new applications in areas such as oil and gas exploration and Geographic Information Systems; a Help Desk and Customer Service Department provide multi-lingual client assistance.

An email newsletter and on-demand training courses keep clients up to date with developments and initiatives.
